IBPM Annual Meeting 2019

From model systems to therapies

Design by Glauco Di Stefano

Rome, May 9th 2019
Sala Marconi CNR

09.00 - 09.20 **Registration**

9.20 - 9.30 **Patrizia Lavia** IBPM Acting Director
Welcome

9.30 - 9.40 **Tullio Pozzan** Director of the CNR
Department of Biomedical Sciences
Greetings

Session 1. Drug discovery (part 1)

9.40 - 10.30 **Ferdinando Squitieri**
IRCSS Casa Sollievo della Sofferenza and CSS-
Mendel
*Huntington's disease: from biology to clinics
towards new therapies*

10.30 - 10.50 **Elisa Caffarelli**
*The European Paediatric Translational Research
Infrastructure (EPTRI): the bridge towards the
future of paediatric medicine*

10.50 - 11.10 **Pierpaolo Ceci**
*Preclinical evaluation of a stimuli-sensitive
nanocarrier based on the human ferritin for cancer
therapy*

11.10 - 11.40 **Coffee break**

Session 1. Drug discovery (part 2)

11.40 - 12.00 **Theo Battista**
*A double approach for anti-trypanosomatid drug
discovery targeting Trypanothione reductase, a key
enzyme for the redox equilibrium in Trypanosomatids*

12.00 - 12.20 **Adele Di Matteo**
*Exploiting nucleophosmin interactions for the
treatment of acute myeloid leukemia*

12.20 - 12.40 **Veronica Morea**
*Rational design of peptides for biomedical
applications*

12.40 - 13.00 **Linda Celeste Montemiglio**
*Cryo-EM structure of the human Ferritin-
Transferrin Receptor 1 complex*

13.00 - 14.30 **Lunch break and poster session**

Session 2. Model systems in basic and applied research (part 1)

14.30 - 15.20 **Giulio Cossu**
Regenerative Medicine Chair, University of
Manchester, UK
*Ex vivo gene therapy for Duchenne Muscular
Dystrophy*

15.20 - 15.40 **Claudio Passananti**
Artificial Transcription Factors

15.40 - 16.00 **Chiara Mozzetta**
*H3K9 methylation controls Fibro-Adipogenic
Progenitors identity and skeletal muscle repair*

16.00 - 16.20 **Coffee break**

Session 2. Model systems in basic and applied research (part 2)

16.20 - 16.40 **Maria Grazia Giansanti**
*Investigating the molecular mechanisms underlying
the neurological defects associated with Congenital
Disorder of Glycosylation type IIe using Drosophila
as a model system*

16.40 - 17.00 **Davide Marzi**
*Constitutive photomorphogenic 1 (COP1)
mediates light-controlled stamen growth in
Arabidopsis thaliana*

17.00 - 17.20 **Patrizia Filetici**
*From yeast to cancer cells, epigenetic cross-talk
and metabolism*

17.20 - 17.40 **Ambra Natalini**
*Cell cycle analysis of clonally expanding antigen-
specific CD8 T cells at different times after
vaccination*

17.40 - 18.00 **Cinzia Rinaldo**
*Pancreatic tumor formation and progression
studies in the era of organoid models*

18.00 *Concluding remarks and meeting closure*
